THERE TO CARE

*Response For Corona
Appeal For Help*

DFY is a pan India humanitarian organization with international presence and is working in various disaster hit zones since last 13 years.

**Make a difference
for people
who needs it the most**

Doctors For You (DFY) is a registered society, registered under the Societies Registration Act 1860 Section 21 having **Registration no. F-56886(Mum).**

DFY focuses on providing medical care to the vulnerable communities during crisis and non-crisis situation, emergency medical aid to people affected by natural disaster, conflicts and epidemics. We are also committed to reducing disaster risk to human society by delivering trainings and capacity development in emergency preparedness and response. The work of DFY is guided by humanitarian principles of humanity, impartiality, and neutrality. It offers services and assistance to people based on need, irrespective of race, class, caste, religion and gender.

Doctors for You was **founded in India in 2007**, by doctors, medical students and like-minded people with a **vision of "Health for all."** Currently, DFY is working on various projects in different states of India involving health professionals, Disaster Management Practitioners, Social Workers and Administrative Staff.

The organization received several awards viz. **The SAARC Award (2010), The British Medical Journal Group Award (2009), Golden Ruby Award (2015) and recognition from State Governments** for its outstanding contribution to the humanitarian field.

THERE TO CARE....

Doctors for you

Message From The Founder

The last 15 months have been exhausting and unfortunate on the world, with number of people being infected with and succumbing to the Corona virus. This pandemic has been very harsh on all of us, but amidst the critical situation all around, Doctors For you (DFY) stood strong for everyone. DFY has always been responsive to all kind of disasters and emergencies, be it the Kokrajhar violence, Nepal Earthquake, Bihar Floods or the Kerala Floods. COVID-19 pandemic has given us the opportunity to serve the nation as we took the challenge as a way to prove ourselves by doing the needful for the affected community.

In tough times like these, where everybody ended up questioning and blaming the system for the failure and crisis of Health Care services in India, DFY instead of being a part of the blame-game, came forward and joined hands to reduce the burden on different state governments and strengthened them. DFY is currently managing a number of hospitals along with the state governments and is also actively donating needful resources such as Oxygen cylinders, ECG machines, ventilators, PSA Based Oxygen plants, BP apparatus, Pulse oximeters etc. wherever required. We are also extending our support to the medical staff by donating PPE Kits and consumables through our 'Protect the Protectors' campaign.

DFY is currently running over 38 dedicated COVID19 Hospitals pan India. We have so far treated over 42,000 COVID19 patients and the number is still rising. Along with treating patients, we are also running Vaccination Centers (>80

teams on ground until mid-June) and till date we have vaccinated over 4.50 lakh people. Scaling up the vaccination drive is the only way forward to recover our economy and reduce mortality due to COVID19.

Considering the number of people that are fully immunized with COVID19 is still very less, third wave seems inevitable and it can hit India by October-November 2021. DFY is already preparing for 3rd wave and as predicted by some experts, the 0-18 age group might get affected at large during the same. DFY is setting up well equipped pediatric wards with child friendly environment in different states.

I am very happy to see the way DFY team has responded in this crisis and emerged as one of the most trusted and dependable humanitarian organizations for any health emergency across India. We currently have more than 1200 doctors, nurses and paramedical staff are on field serving the nation.

We are able to do all this because of the prompt support provided by our donors and partners. I would like to extend my deepest gratitude to all our funders, partners, well-wishers, employees and other stakeholders for having trust in Doctors For You. We hope that you keep supporting and encouraging us to continue our work and improve the quality of health of all citizens.

[Thank you all](#)
for the continued support.

Thanks & Regards,
DR. Ravikant Singh

Note From The President

DOCTORS FOR YOU (DFY) has been at the frontline in managing the biggest ever crisis faced by the medical services in the country. We have been working for the cause since the beginning of the pandemic in March 2020. Our first initiative in this regard was to support the health care staff involved in COVID care by providing them with quality PPE kits, gloves, N-95 mask, face-shields, shoe covers, sanitizers and many other essentials through our programme - "Protect the Protectors". The essentials were supplied in bulk to more than 135 government hospitals across the country, including AIIMS (Delhi).

During the first wave of the pandemic, with our strong ground presence across many states, we could rapidly mobilize trained manpower in the form of young doctors, nurses and para-medical staff to support escalation of medical facilities in existing government settings.

As the need for beds grew further, we took up the challenge of converting banquet halls and stadiums into makeshift hospitals. Shehnai banquet hall, next to LNJP hospital, was the first one to be allotted to us for this purpose, wherein we instated a fully functional 100 bedded facility within a short span of five days. This was followed by a 500 bedded facility at the Commonwealth Village, a task completed within a matter of seven days. As the impact of first wave receded, DFY continued with recruitments and active training programmes for requisite manpower, in anticipation of a second wave. Simultaneously, we also started a campaign "Vaccine is better than a ventilator" to combat vaccine hesitancy among the lay public.

When the second wave hit the country, we promptly escalated our services and within a span of 15 days started more than 30 makeshift hospitals across Delhi, Haryana, UP, Bihar, Maharashtra, Chhattisgarh, Karnataka, Andhra Pradesh and Tamil Nadu in collaboration with the respective state governments. During the second wave, we catered not only to mild but also to moderately affected individuals, with facilities of oxygen beds and high dependency units incorporated within the centers. Simultaneously, we started establishing vaccination clinics across the country.

Presently DFY is running 38 make shift hospitals across the country, with a total of about 9000 beds. We are currently also running 85 vaccination centers, distributed across Delhi, UP, Haryana, Maharashtra, Jammu and Kashmir, Telangana, Kerala, Tamil Nadu, Karnataka and Bihar and have vaccinated about half a million population so far. We are simultaneously working on strengthening of medical infrastructure in PHCs, CHCs and district hospitals by providing equipments in the form of oxygen concentrators, oxygen plants, ventilators, bipap machines, ambulances, X-ray machines, USG machines, CT scanners and Lab equipment support.

I took over as the president of DFY from Dr Ravikant Singh in 2017. It has been a tough, but a very satisfying and humbling experience for me so far. I took upon myself the task of reorganizing the organizational structure of DFY, strengthening individual task teams and making the workings of the organization fully transparent to the donors. I am extremely proud of our team of doctors, nursing and paramedical staff and administrative staff whose untiring efforts have made DFY reach such heights in a short time frame of 13 years since its inception.

We have had support of many individuals and organizations who have generously supported our efforts throughout this period. I would like to especially mention and express my thank to corporate CSRs, fundraising groups and lot of individual donors with special mention of: HCL Foundation, Boeing India Private Limited, Azim Premji Foundation, CII, Wipro, Walmart, Facebook, Give India, UNICEF & MSDF.

Thanks & Regards,
Dr. Rajat Jain

Covid Care Summary Report

Given the surge in Covid cases across India, citizens began to panic as the public health infrastructure was overburdened and under prepared leading to shortage of oxygen supply, beds with ventilators, essential medicines and this lack of resources and mismanagement gave rise to widespread fear and anxiety amongst masses leading to increased morbidity and mortality.

To alleviate further sufferings and to prevent more deaths, DFY played a major role in delivering healthcare services to the vulnerable communities and providing capacity building trainings, emergency medical aid to the people affected by natural disaster, conflicts and epidemics.

The organisation has worked and provided relief services in Jammu & Kashmir, Punjab, Haryana, Delhi, Gujarat, Rajasthan, Uttarakhand, Uttar Pradesh, Madhya Pradesh, Chhattishgarh, Bihar, Assam, Maharashtra, Odhisa, Andhra Pradesh, Sikkim, Manipur, Karnataka, Tamil Nadu, Kerala etc.

Amidst the Covid-19 Pandemic, Doctors For You (DFY) emerged as one of the biggest humanitarian organization working for public health in India. With many campaigns going on in different states, DFY was able to distribute its resources, educate people regarding the virus and uplift the underprivileged class, especially in the rural areas. It was at this crucial point that, DFY partnered with state governments, District Disaster Management Authorities and Corporate Donors to arrange for required resources such as PPE kits, Oximeters, beds with Ventilators, life saving medicines, oxygen concentrators, setting up of oxygen plants etc and managed to **save thousands of lives** by converting hospitals into Dedicated Covid Care Centers (DCHCs) or by making make shift Covid Care Centers (CCCs) in many states of India.

DFY is a pan India organisation with international presence and working in various disaster hit zones for thirteen years.

We have been successfully able to set up 38 Covid Care Centres pan India with total bed capacity of 9000. Our key agenda is to make each hospital open to all and always be stacked with necessary resources.

Among key facilities at these centers are installation of Oxygen plant to provide continuous supply of oxygen to patients, 24/7 availability of emergency, Ambulance Services, Covid Testing services, Essential blood investigations with radiological investigations, Patient health status update on call to family members on a daily basis, Home Covid Care Services, Proper Diet and Nutrition management of Covid patients - Welfare departments for patients & staff, etc.

Our key agenda is to make each hospital open to all and always be stacked with necessary resources. Appropriate resources and supplies such as hospital beds, oxygen, ambulances, medicines, frontline workers, etc, were pooled in from all across the globe with the help of our partners. DFY took the responsibility of managing Covid Care Centres by recruiting human resource such as doctors, nurses, and admin staff in large numbers to handle the ongoing crises.

With the help of our trained doctors and nursing staff, these CCCs and DHCs started admitting mild to moderate Covid patients since the first wave from June 20th, 2020 and till now have been able to clinically manage **42,000 plus people.**

All our efforts were to save the lives of the patients with a continuum of care approach by transferring critically ill patients to the tertiary care hospitals who were better equipped for such cases. We followed standard approach by treating mild/moderate covid cases as per AIIMS treatment protocol which is no less than the gold standard.

Vaccination Summary

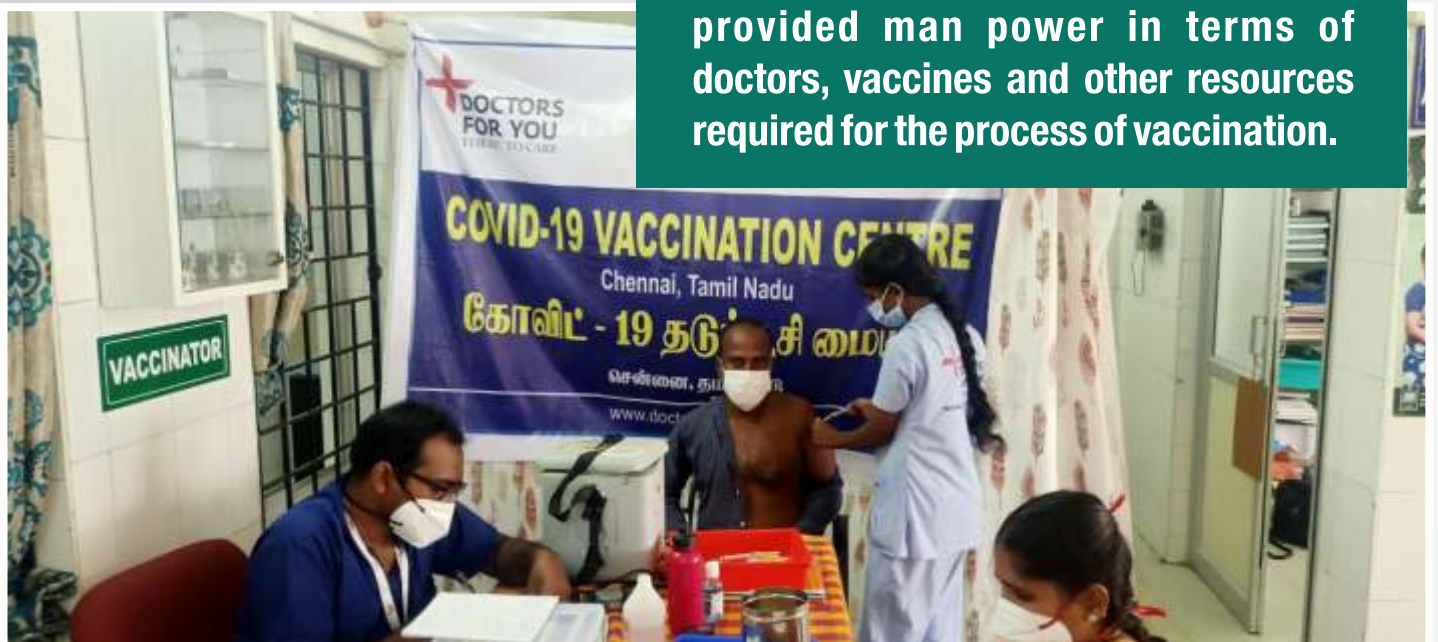

After carefully monitoring intermittent rise and spread of multiple waves of COVID-19 the World Health Organisation (WHO) contended that countries must roll out large scale vaccination programmes to impede the spread of the virus. India started its own manufacturing of COVID vaccines and sought help from other nations and international donors to provide vaccines for all citizens.

Each state was given the responsibility to make sure that vaccination camps were held at local and zonal levels and that people were being vaccinated. However, because of considerable vaccine shortages and rampant misinformation many people were left unvaccinated and succumbed to Corona. To combat this vaccine illiteracy, debunk misinformation regarding vaccination process and to help the state governments to control morbidity and mortality Doctors For You decided to step in.

Doctors For You team along with valuable support of its donors collaborated with the district administration of 10 different states in rolling out the vaccination programmes in these regions. Around 85 vaccination centers have been established in states of Delhi, UP, Haryana, Maharashtra, Jammu and Kashmir, Telangana, Kerala, Tamil Nadu, Karnataka, Bihar, where we have successfully vaccinated about half a million population. It was felt that providing vaccines alone won't suffice to help the community and that there still was a huge need in terms of medical human resources, cold chain management, vaccine distribution and immunization activities.

That's where DFY stepped up and provided man power in terms of doctors, vaccines and other resources required for the process of vaccination.

It is unfortunate that because of various myths regarding vaccines and lack of awareness, vaccination coverage rate remains to be very low in India. The rising cases in the country make it imperative that we not only provide resources but also educate the masses in how vaccines work. It's important to make people understand that in stimulating the body's adaptive immunity; they help prevent sickness from an infectious disease. When a sufficiently large percentage of a population has been vaccinated, herd immunity is an eventuality. This Herd immunity protects those who may be immuno compromised and cannot get a vaccine because even a weakened version would harm them.

Today, we know that to win the fight against Corona, vaccination is the most effective tool along with following other Covid Appropriate Behaviour. Contributing to the vaccination drive in India is our biggest priority right now and we are hopeful that through increasing vaccinations, fostering awareness through outreach programs, humanitarian relief efforts and critical donations of medicines and needed equipment, India will steadily recover from this crisis.

Simultaneously, we also started a campaign

“Vaccine is better than a ventilator”

to combat vaccine hesitancy among the lay public.

Protect the Protectors

Summary

Both the waves of Covid 19 have been really aggressive in India. The high virulence of this virus has affected millions and a large number of people have succumbed to death. During this time, protecting ourselves by following appropriate covid behaviour is not just the way out to protect oneself but also is a measure to care for others by preventing spread of the virus.

Frontline workers (Protectors) in Covid Pandemic have been working tirelessly to break the chain of spread of virus and safeguarding others by maintaining safety, prescribing to order, healing the infected patients with suggested treatment and are ensuring supplies of daily need.

They need to be protected foremost to maintain and run functions of routine course of life for all citizens, in these critical times.

While India prides itself as the largest producer of PPE kits worldwide, concerns regarding the quality of the PPEs have been raised from time to time. Our health care workers were dedicated to saving as many lives as possible. It also became evident that their own lives were at stake because of very poor-quality personal protection kits being provided to them. Complaints of inferior quality PPE kits were received from doctors posted in COVID duty in hospitals which cater to large crowds on a daily basis such as AIIMS, LNJP, etc. It was in that crucial time that DFY procured over-priced PPE and donated around 1000 PPE's in LNJP hospital for the safety of doctors, nursing, para medical staff and other front-line workers.

So far, the organisation has procured high quality personnel protective equipment and supplied to Government hospitals of worth 20 crore from quality suppliers.

Supplying PPE kits was done under the project called
'PROTECT THE PROTECTOR'

This project was launched last year in Delhi. Looking at the scale of our efforts, DFY started receiving loads of PPE kits from its donors which we subsequently distributed to various hospitals including **RAJIV GANDHI, LNJP, AIIMS, SARFDURJUNG** etc. Now in these dedicated covid care hospitals and make shift covid care centers, our health care workers are provided with best protective gear so they can perform their duty without any hindrance.

“

Our motto is to provide the best care to our patients and work efficiently while keeping all staff healthy.

”

All the staff including medical, paramedical as well as house-keeping and orderlies are provided with PPE kits, as well as trained in proper donning and doffing.

Training and Capacity Building Summary

Right from the inception of the Covid crisis, DFY has been very conscious of the need to have a trained staff that is prepared to manage any complication. For best patient care, it's a mandate to have our resources ready and to have the knowledge of using those resources. During the pandemic, our doctors, nurses and other staff have been trained in various capacities. From managing mild patients in a Covid care setup to taking care of critical patients in ICU, multiple trainings have been conducted over this past year.

These training comprised of details to the staff regarding Covid appropriate behaviour including self-protective measures. This included teaching the staff the correct way of wearing, removing and proper disposal of PPE kits and other protective wear.

A team of doctors and nurses were initially trained and equipped to manage Covid-19 and its associated complications. Over time, a series of multiple sessions were organized by specialists to help doctors learn how to manage other comorbidities and emergencies which might occur in Covid wards like **Myocardial Infarction, seizures, Diabetic Keto Acidosis etc.**

Nursing Orderlies were given hands on training on managing, handling, and replacing oxygen concentrators & cylinders for patients on oxygen support and comforting the patients by empathetic behaviour by technical team, experts, doctors and supervisor. Capacity building exercises for Housekeeping staff was done on maintaining hygienic conditions at CCC, sanitising, disinfecting the area regularly and managing Bio-medical waste by the team of dedicated doctors and their supervisor.

It's very important for us to create healthy & happy ambience at the facility to help patients recover fast and these hands on training not only help patients but also build a sense of confidence in doctors, nurses, staff etc. to perform their duties without any hesitation or delay. Through the trainings and capacity building exercises we have been able to facilitate positive and constructive interaction with patients and have given them a feel of extended family culture.

Some of these training include:

1 Screening protocol and management of Covid including intubation and providing proper oxygen support for patients at all our Covid Care Facilities.

2 Knowledge of handling equipment, Replacing oxygen concentrators/cylinders and rational use of resources to be used in patient care at CCC, on use of Ventilator machines, suction machines, ABG analyser & BiPAP machine for Doctors & Nurses.

3 Managing Bio-Medical Waste at Covid Care Centre

4 Special training was conducted by a senior Paediatrician on handling paediatric case for suspected emergency.

5 Training from fire department for managing any fire emergency at any of our covid care centers.

Because of continuous mutating nature of virus, changes in the symptom presentation and different national directives /guidelines, it is necessary to keep our health care workers updated for proper care and case management.

Community Outreach Summary

The concern was not just the morbidity and mortality associated with Covid illness but also the spread of misinformation, fear and panic being created in the minds of certain communities and also the stigma attached with has led to a divide between different sections of society. It became evident that unless we have social interventions to deal with the stigma and fear, chaos would ensue. Understandably so, certain behavioral and social interventions were sought after to change the graph of mortality and morbidity due to COVID.

In this regard, Community outreach activities such as awareness programs or sensitizing programs can help a lot in achieving a specific goal. When done with proper strategy and planning, the desired outcome can be easily achieved. Behavioural and social interventions have become an essential component of efforts to mitigate the effects of outbreaks. Intervention strategies for prevention, control and mitigation of outbreaks heavily rely on intersectoral coordination/collaboration, community engagement, community participation and ownership.

It involves community members including local front line workers such as ASHAs, ANMs, Aganwadis, religious leaders, local leaders or any influential member who has a strong connect with her or his people/ community to provide them with guidance and counselling on following Covid Appropriate behaviour guidelines.

In urban and rural areas both, spread of misinformation and fear has been the biggest challenge to beat, regarding COVID-19.

To tackle these issues, DFY team collaborated with UNICEF in certain states like Punjab, Delhi, Uttarakhand, Mumbai etc. for promotion of COVID Appropriate Behavior (CAB) through Risk Communication and Community Engagement Activities (RCCE). The activity becomes even more essential, to control the situation because it enlightens the community to make a wise decision as to how they can stop the spread of the virus, protect themselves and influence others for the same with the right information in hand.

For promotion of CAB in the states and the specific geographic areas / high-risk spots that are challenged by a high concentration of COVID cases, Doctors For You with support from UNICEF has implemented a project name “Reduction of Risk” for COVID 19 infection through the promotion of COVID preventive behaviors and engaging communities.

The project has contributed towards improving the community’s behavior to adopt and maintain COVID appropriate behavior and along with uptake of COVID vaccine services to reduce the impact of COVID-19. This approach is expected to result in both improved service uptake, better service quality and improved knowledge of and intent to practice the behaviours. For the same purposes of spreading awareness amongst masses, concept of Covid Awareness Van has been executed in various villages and peri-urban areas of these states to spread awareness amongst the communities and share real-time solutions.

There were activities such as Pro-active distribution of masks and sanitizers to farmers and community members. Additionally, distribution of pamphlets, signs in creative signage in the local language were put up at various locations as an integral part of the activity to upscale and make available all information at the community level in a more involved and readable form. Other than that, meeting up with people in person and sending mobile medical units (MMUs) as well as mobile information units (MIUs) has played huge role in alleviating scare and fear with respect to vaccination and for prescribing covid appropriate behaviour.

Consistent reinforcement of awareness activities and correct information need to be propagated from experts/doctors/government among community to address the misconceptions about Covid 19 and curb spread of fear/panic among masses due to false/fake news, concerning the Covid pandemic.

Infrastructure Support

Summary Report

The exponential rise in the demand of oxygen cylinder and beds equipped with oxygen, asserted a need for a multifaceted approach in dealing with a crisis of this scale and kind. Individuals, several organisations and institutions pooled in their resources to cater to people for this health emergency. It was a given condition that every help and each hand would have to contribute for the desirable outcome of saving lives and reducing morbidity. Hence resources were pooled from all across the states and authorities to deal with the crisis.

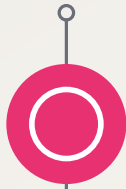

When the second wave hit the country, we promptly escalated our services and within a span of 15 days started more than 30 makeshift hospitals across Delhi, Haryana, UP, Bihar, Maharashtra, Chhattisgarh, Karnataka, Andhra Pradesh and Tamil Nadu in collaboration with the respective state governments.

During the second wave, we catered not only to mild but also to moderately affected individuals, with facilities of oxygen beds and high dependency units incorporated within these makeshift covid care centers. Simultaneously, we started establishing vaccination clinics across the country.

We are simultaneously working on strengthening of medical infrastructure by supporting more than 140 PHCs, CHCs and district hospitals by providing equipment in the form of more than 2000 oxygen concentrators, 27 oxygen plants, 50 ventilators, 500 para monitors, 50 BiPAP machines, approx. 10 ambulances, Steve genome laboratory machines, X-ray machines, USG machines, echo machines, CT scanners, Lab equipment support and strengthened IT support by providing computers, printers and laptops.

DOCTORS FOR YOU

THERE TO CARE

DELHI

Delhi had been hit hard since the beginning of the first wave of Covid prompting an immediate emergency response to curtail infections and save lives.

In response to the rapidly changing local scenarios DFY was required to provide immediate health services. DFY team worked closely to enhance the public private partnership system that could work best for judicious utilization of available resources.

Doctors For You in Delhi has been working closely with Delhi government on multiple health interventions in Central, East and Shahdara districts.

COVID Treatment Centre

Given the sudden surge in the number of COVID patients across Delhi, a defined/demarcated space inside Yamuna Sports Complex, Commonwealth Games Stadium, Rouse Avenue, Shehnai Guesthouse were transformed into a makeshift, full-fledged COVID Care Centres, well equipped with facilities to clinically manage COVID patients with mild to moderate symptoms. A total capacity around 1500 beds were provided in Delhi NCR, in response to second wave of corona. An additional 2000 COVID beds were provided to LNJP hospital to cater to the needs of COVID patients.

Among key facilities at these centres are installation of Oxygen plant with a capacity of producing of 619 litres/minutes. We also established 24x7 availability of emergency ambulance services, COVID testing services, patient health status update on call to family members on daily basis, Home COVID Care Services,

Proper Diet and Nutrition management of COVID patients, Welfare departments for patients & staff, etc. Our approach for treatment of mild/moderate COVID patients followed AIIMS treatment protocol which is considered as the gold standard of care in our country, administered in proper care of specialist, experienced faculty, doctors, etc.

Till the month of June, 2021, we have been able to treat and manage approximately 3200 patients at our COVID care facilities in national capital territory of Delhi.

Quality of these COVID Care Center services is manned by best team efforts of around 240 healthcare workers including doctors, nursing staff, and supporting staff team constituting of Nursing Orderly's, Housekeeping, Data Entry Operators, Supervisors etc. altogether more than 150.

Table: Details of COVID Treatment Centre supported by Doctors For You in Delhi

Sr.No	Name of the Centres	Total No. of Beds Supported	No. of General Beds supported	No. of HDU/Oxygen Beds supported	Total No. of Beneficiaries
1	Shehnai Guest House CCC	100	30	70	356
2	Common Wealth Games CCC	460	-	460	2373
3	Yamuna Sports Complex	800	-	800	320
4	Rouse Avenue CHC	125	-	125	99

PROTECT THE PROTECTOR CAMPAIGN

Frontline workers (Protectors) in COVID Pandemic are tirelessly working to cut the chain of spread of virus, safeguarding others by maintaining security and order, healing the infected patients with suggested treatment, ensuring supplies of daily need, etc. They need to be protected to maintain and run functions of routine course of life for all citizens, in these critical times. Supplying PPE kits was done under the project called '**PROTECT THE PROTECTOR Campaign**'.

This project was launched last year in DELHI. Last year it was found in LNJP hospital that doctors were recruited but protective gear was not available and not given, similar problem arose in AIIMS, RAJIV GANDHI and many other hospitals. In that crucial time DFY procured over-priced PPE and donated around 1000 PPE's in LNJP Hospital for the safety of doctors, nursing, para medical staff and other front line workers. The details of PPE material distributed is given below in the table.

Table: Details of Protector the Protector Campaign Support in Delhi

Name of COVID Treatment Centre/Hospital/Departments/Others)	
1. AIIMS	15. Shehnai, Karol Bagh
2. Lok Nayak Hospital	(LNJP Annex-State Govt. SPL center)
3. Rajiv Gandhi Super Special Hospital	16. Golden Moments
4. Safdarjung Hospital	(State Govt. SPL center)
5. LHMC (SSKH+KSCH)	17. Raj Vatika, Karol Bagh
6. RML Hospital	(State Govt. SPL center)
7. Gangaram Kolmet Hospital	18. National Club, New Delhi
8. Dr. Baba Saheb Ambedkar Hospital	(State Govt. SPL center)
9. D.D.U. Hospital	19. ESIC Hospital
10. Dr. Hedgewar Arogya Sansthan (HAS)	20. Saverker Arogya Sansthan COVID Center
11. Bhagwan Mahavir Hospital (BMH)	21. BDP Hospital
12. Raja Garish Chandra Narela	22. GB Pant Hospital
13. Sanjay Gandhi Memorial Hospital	23. Common Wealth COVID Center
14. Basai Darapur PGO	24. Railway COVID Health Center

Details of major PPE material support: 1,30,100 Advanced PPE, 1,30,300 N-95 masks, 1,18,500 examination gloves, 5575 Pulse Oximeters, 1,43,700-foot covers, 1,10,600 Long shoe covers, 1,31,700 Surgical Gown, etc.

COMMUNITY ACTIVITIES

Community activities such as awareness programs or sensitizing programs can help a lot in achieving a specific goal. When done with proper strategy and planning, the desired outcome can be easily achieved. It involves community members including local front line workers such as ASHAs, ANMs, Aganwadis, religious leaders, village pradhans or any influential member who has a strong connect with her or his people/community.

In urban and rural areas both, spread of misinformation and fear has been a big challenge regarding COVID-19. Meeting up with people and sending mobile medical units as well as mobile information units has played huge role in alleviating scare and fear with respect to vaccination and for prescribing COVID appropriate behaviour.

Some of the key Community Activities taken up by Doctors For You in New Delhi were-

Sensitizing community through Mobile Medical Units

Home COVID Care Services for community people of various district in Delhi

Post COVID Complications (PCC) Management at Gokulpuri UHC

Improving COVID Appropriate Behavior (CAB) in the slum population

Our community activities have resulted into following

- We were able to Reach out to more than 120000 people in the community through Audio visual mobile units.
- Trained 240 self-help group members for COVID-19 awareness in the community along with 194 women trained for mask making in Budh Nagar, Pillangi village and Ambedkar basti of Delhi.
- Conducted multiple community meeting on use of mask, physical distancing, respiratory, and hand hygiene promotion session in the community in Budh Nagar, Pillangi village and Ambedkar basti of Delhi.
- Orientation training to 900 youths, community volunteers, community coordinators .
- Mapped 45 facilities/institutions (health facilities, Anganwadi Centre, schools etc.) and mapped highly congregated places and installed posters and creative signages in 75 locations.
- 60 wall paintings at strategic locations for use of mask, hand hygiene and social/physical distancing. This Use of creative signage on use of mask, physical distancing, respiratory and hand hygiene at facilities/institutions and strategic locations helped achieve a desirable outcome.
- Through iNagrik app survey on community feedback, we received responses from more than 6000 population.
- Community based monitoring of COVID 19 preventive measures in 3 urban slums.
- Conducted survey on COVID-19 appropriate behavioural surveillance in 900 selected locations of Delhi.
- COVID 19 screening of more than 1500 vulnerable population in three urban slums.

VACCINATION CENTRE

Vaccination is the most effective method of preventing infectious diseases such as COVID-19. In the past, the process of Vaccination has been used worldwide for the eradication of smallpox and the elimination of diseases such as Polio and tetanus throughout the world. In Delhi, with the help of donors we have been able to function with ESIC hospital Okhla and vaccinate the people residing nearby at its two centers. ESIC Center 1/ Team 1 and ESIC team 2. Very recently, on June 10th 2021, DFY team with donors support has started two more centers at Kailash Nagar Pratibha Vidyalaya and at Sarvodaya Vidyalaya .

Table: Details of COVID-19 Vaccination in Delhi

SI. No.	Name of the Centres	Citizens		Front Line Workers		Health Workers	
		(1st Dose)	(2nd Dose)	(1st Dose)	(2nd Dose)	(1st Dose)	(2nd Dose)
1	Shehnai ESIC Team 1	344	1112	3	3	8	2
2	ESIC Team 2	251	842	2	2	19	7
3	Pratibha Vidyalaya	56	14	6	1	7	2
4	Sarvodaya Vidyalaya	42	18	5	5	5	3

TRAINING AND CAPACITY BUILDING

Many trainings and capacity building exercises have taken place at our COVID care centers. These training comprised of details to the staff regarding COVID appropriate behaviour including self-protective measures. This included teaching the staff the correct way of wearing, removing and proper disposal of PPE kits and other protective wear. It is very important for us to create healthy & happy ambience at the facility to help patients recover fast. These hands on training not only help patients but also build a sense of confidence amongst doctors, nurses, staff etc. to perform their duties without any hesitation or delay. Through the trainings and capacity building exercises we have been able to facilitate positive and constructive interaction with patients and to give a feel of extended family culture.

Details of Training and Capacity Building in Delhi

Screening protocol and management of COVID including intubation and providing proper oxygen support for patients at our four COVID Care Facilities in Delhi.

Handling of equipment's, Replacing oxygen concentrators/ cylinders and rational use of resources used in patient care at CCC

Managing Bio-Medical Waste at COVID Care Centre

Special training on paediatric case management for suspected emergency.

Training from fire department for managing any fire emergency at CWG

EQUIPMENT SUPPORT

Due to immediate and urgent need for oxygen requirement, hospital beds equipped with oxygen supply, increasing number of deaths per day during the second wave of COVID it became imperative that support was needed from all the agencies and institutions.

Every help and each hand would contribute to the desirable outcome of saving lives and reducing morbidity hence resources were pooled from all across the states and authorities to deal with the crisis. Because of the immediate need and urgency in setting up of the COVID care centers to deal with growing number of cases, many important equipment were provided by District administration and other corporate donors.

Table: Equipment and Other Support Provided by Doctors For You in Delhi

SR.NO	Name of COVID Treatment Centre/ Hospital/ Departments/ Others	Type of Support
1	CWG	Oxygen concentrators PSA Plant CAT & RAKSHAK Ambulance Oxygen supply kit Oxygen cylinder IV stand BP apparatus
2	Shehnai	Oxygen concentrators Oxygen flow meter Multi para monitor ECG machine Nebulizer Machine BiPAP machine Wheel chair ABG analyser Spirometer Patient food table
3	Rouse Avenue	Oxygen concentrator Oxygen flowmeter Ventilator device Spirometer Oxygen supply kit Oxygen cylinder IV stand BP apparatus
4	Yamuna Sports Complex	PSA plants Multi para monitor Oxygen cylinder Oxygen concentrator Saturation probe BP apparatus & Automtaic BP machine CAT & Rakshak Ambulance ECG machine Nebulizer machine BiPAP machine Wheel chairs

OTHER COVID-19 RELATED ACTIVITIES IN DELHI

COVID has not only impacted physical health but also mental and emotional health of masses. All the news and information of deaths, mass cremations, unavailability of resources during peak wave and loss of near & dear ones have created panic and chaos amongst our people. Due to increased burden on already burdened health infrastructure and strained health professionals, DFY team has taken all efforts to make sure that along with the patient welfare, staff welfare is foremost too.

Some highlights of our activities are mentioned below:

1. COVID-19 Testing Facility through Rapid Antigen Test Kit.
2. Patients Health status updates to their family over phone by Doctors on Duty.
3. Facilitating communication between Patient in isolation at our CCC and their family members.
4. Recreation of COVID Patients at CCC and psychological support.
5. Yoga Sessions at COVID Care Centers
6. Diet Management of COVID Patients
7. Promoting Patient and Staff welfare with effective administrative measures at our CCC.

MAHARASHTRA

State-wise activity reports

The date and day wise trends of COVID-19 cases in Maharashtra showed a sharper rise in national figures as the days were progressing. Due to the outbreak of the virus in dense slum areas of **Dharavi and Koliwada, Mumbai** has the record number of cases in Maharashtra. With numerous areas declared containment zones or sealed off, the state has initiated aggressive testing in order to mitigate the spread.

In Maharashtra, DFY has worked extensively in Mumbai against this global pandemic closely with govt and buttress health infrastructure and contain the spread. Following are some of the interventions by DFY in the state of Maharashtra.

Covid Treatment Centre

The surge in Covid-19 Cases in Mumbai, Maharashtra resulted into increase in demand of Health care services. In view of this demand, and to remove the pressure from Government health care facilities DFY has taken following initiatives-

A 100 bedded Fully functional Covid isolation ward in Collaboration with **Wipro Foundation at MEast Ward PMG** isolation Centre.

A 100 bedded Fully functional Covid isolation ward in Collaboration with **Wipro Foundation at MEast Ward PMG** isolation Centre at UHC Isolation Centre.

SRA Chandiwala Jogeshwari isolation Ward.

Table: COVID Treatment Centre Details

Sr. No	Name of the Centres	Total No. of Beds Supported	No. of General Beds supported	No. of HDU/Oxygen Beds supported	No. of ICU Beds supported	Total No. of Beneficiaries
1	PMG isolation Ward	100	100	-	-	1428
2	UHC isolation Centre	100	100	-	-	895
3	SRA Chandiwala Centre	600	140	-	140	342

PROTECT THE PROTECTOR CAMPAIGN

Under this campaign, DFY has supported many health care workers from various hospitals with PPE materials as it is needed most to treat the COVID-19 cases.

Table: Details of Protect the Protector Campaign Support in Maharashtra by DFY

NAME OF COVID TREATMENT CENTRE/HOSPITAL/DEPARTMENTS ETC.			
KJ Somaiya	JJ Hospital	Bhatiya Hospital	Seth AJB ENT Hospital
TISS Hospital	KEM Hospital	Joy Hospital	Hindu Sabha Hospital
Sewri Hospital	CAMA Hospital	Mithaghar BMC School	LTMG Hospital (SION)
Nair Dental Hospital	GT Hospital	kasturba Hospital	Nair Hospital
Shatabdi Hospital	Seven Hills Hospital	Poonam Nagar	Cooper Hospital
Maa Hospital	St George Hospital		

Details of major PPE material support: 98,400 PPE Kits, 79,400 N95 Masks, 59,400 Face Shields, 2,000 Infrared Thermometer, 2,000 Pulse Oxymeter, 20,000 boxes of gloves (other things such as sanitizers, stands etc. given too)

COMMUNITY ACTIVITIES

Reached more than 4,22,400 people in the community through 1408 miking sessions.

Trained 98 self-help groups (972 members) for COVID19 awareness in both wards along with 264 and 323 SHG members and women from the community trained for mask making in M/East and G/North ward respectively.

Conducted 155 and 156 WASH session in the community in M/East and G/North ward respectively.

Painted 20 walls for COVID19 related awareness practices in each ward.

Mapped hotspots, highly congregated places and implemented IEC posters and creative signages at 50 locations in each ward.

Operationalized screening at 15 and 9 health post in M/East and G/North ward respectively.

Fever screening conducted for 60,071 people in both wards wherein approximately 5400 high risk contact were traced for COVID19.

Identified, screened and followed up 10,013 pregnant women, lactating mothers and children <2 years in both wards.

Organized 223 outreach routine immunization camps with 5938 children's immunized

VACCINATION CENTRE

We are working with the MCGM at vaccination centres in Mumbai. As to tackle the Covid 19 pandemic, vaccination is the only solution. Due to the Pandemic there's a huge burden on the Healthcare sector. There's need for professional healthcare workers. To reduce the pressure on Government we are providing Health professionals at the centres in which we are providing **Doctors, Nurses and Health Assistants** in doing the vaccination and supporting the govt in tackling this pandemic.

There are total 9 vaccination centres running across the state which has been supported by DFY in close coordination with Government.

Table: Details of Vaccination Centre supported by DFY in Maharashtra

Sr. No.	Name of the Centres	Citizens (1st Dose) (2nd Dose)		Front Line Workers (1st Dose) (2nd Dose)		Health Workers (1st Dose) (2nd Dose)	
		1	Shatabdi Hospital	8549	2969	629	837
2	Shivaji Nagar UHC	7175	2912	776	932	77	118
3	LBS Maternity Home	4594	3155	114	88	19	90
4	Deonar Maternity Home	2173	1660	74	411	10	88
5	Charkop Sector 1 (Kandivali)	2597	2972	65	20	3	48
6	Parivar Kanjurmarg HP	2291	784	61	57	4	15
7	Bhandup Village (BMC Marathi School)	1631	211	52	2	5	2
8	Ganesh Nagar CVC	1562	937	19	21	7	16
9	Temhipada HP	1706	1240	8	5	6	9

TRAINING AND CAPACITY BUILDING

Following are the list of trainings carried out by DFY to healthcare professionals in Mumbai, Maharashtra-

Table: Details of Training and Capacity Building

Sr.No	Name of the Training	Profile of beneficiary	Total No. of beneficiaries
1	Health Care Workers Training During Covid Phase 1 at UHC and PMG isolation Ward	Doctors & Nurses	797
2	SRA Chandiwala Isolation Ward	Nurses	167

OTHER COVID-19 ACTIVITIES IN MAHARASHTRA

In the state of Maharashtra DFY is covering vulnerable areas and slums in Mumbai. Through Mobile Medical Unit (MMU) suspected patients for COVID-19, and other chronic disorders are being screened with the help of doctors and nursing staffs for easy access to health care services in this pandemic.

As a part of DFY-Wipro Foundation project activity, Mobile medical units reached Dharavi for screening.

During the screening, a pregnant mother named Mrs. Chitra Bate was identified. At first glance she didn't come across as a pregnant as she looked very petite and malnourished. She Came to us with a complaint of dizziness and nausea after Consulting our team got to know she was Pregnant. Data such as personal information, registrations details and medical treatment was collected from the mother. The mother was pregnant for the third time, with first child being 6 years old, second pregnancy being medically terminated due to presence of meconium in amniotic fluid, and third is the present pregnancy.

After a while into conversation with the mother it was found she had pulmonary tuberculosis and she completed her AKT for 6 months. The mother was 3 months pregnant but had not registered in the hospital. She was not on any IFA tablets or didn't have any check up with doctor earlier. She didn't visit hospital for 3 months due to COVID19 fear. Sion hospital, which is a government hospital just 10 minutes away from her residence, had a lot of COVID19 patients so the mother had fear of visiting the hospital. The fear of COVID19 and stigma associated with it delayed the registration of the ANC mother.

Success Story

Name: Mrs. Chitra Prashant Bate

G3 P1 L1 MTP1

G1-6 years old male child operated through C-Section (Meconium Stained Amniotic Fluid (MSAF))

G2 - Medically Terminated pregnancy(MTP)

G3 -Presently Pregnant

She mentioned, "Hospital madhegela tar injection deunmartat, pregnant bai la pan asakartat" (If we go to hospital, they give injection and kill us, they do that to pregnant women also).

She expressed her fear of visiting hospital for registration or check-up. Team after collecting some preliminary information, did counselling as to why it was important for her to visit hospital and get herself registered. Also made her Aware about Covid-19.

One of the volunteer said to the mother, "Tai, hospital madhejauncheck upkarunghya, balachaanitumchanuksaan hot aahe. Tumhi java hospital la nahitar mi yetesobat, tumahalkahihonarnahi. Asa hospital madhekahi karat nahit, hi chukichimahitiahe. Tumhi please jaunnon danikarunghya."

(Tai, go to hospital and get the check-up done, your child and you are at loss. You go to hospital or else I will come with you, nothing will happen to you. Nothing like this happen in hospital, this is wrong information. You please go and get yourself registered). The volunteers visited the ANC mother next day to check if she went to hospital.

After the second visit, the mother got convinced and she visited Sion hospital on 16th September 2020 and got herself registered over there. The tests were conducted as per the advice given by the doctor and the mother is now consuming medicines as prescribed by the doctor. As mentioned earlier, she looked malnourished and in view of that doctors also prescribed her protein powder.

The door to door screening and Mobile medical Unit (MMU) have led to successful registration of the ANC, removal of stigma associated with COVID19 and support in re-establishing of ANC service. Since the community volunteers are from the locality itself, they will ensure the follow up of the expectant mother until she deliver.

KARNATAKA

Karnataka had the second highest rate of Covid-19, with 30,000 cases detected per day during early days of April. There was severe shortage of bed particularly IT Uses with ventilator support as well as previous shortage of man power. bed unavailability for covid patients especially for ICU with ventilator support and also severe shortage for manpower.

Thus in collaboration with Karnataka Govt. we provided the government **hospitals with manpower, PPE materials, infrastructure and medical equipments** to fight the pandemic. We added additional beds to the existing facilities, added modular structure, took over defunct hospitals, transformed hotels, resorts and schools into a covid care center with oxygen beds.

Covid Treatment Centre

Karnataka has reported a sharp spike in COVID-19 cases with the number of active cases increasing during the second vawe, leading to the over burdening of hospitals. DFY felt the need for intervention in this regard and resided to set up 15 Covid Treatment Centre across the state.

Table: Details of Covid Treatment Centre by DFY in Karnataka

Sr. No	Name of the Centres	Total No. of Beds Supported	No. of General Beds supported	No. of HDU Beds supported	No. of ICU Beds supported	Total No. of Beneficiaries
1	Charaka Hospital	150	-	120	30	891
2	Jayanagar GH	33	-	-	33	51
3	Yelahanka GH	51	35	2	14	794
4	Anekal GH	43	36	2	5	668
5	KR Puram Hospital	38	33	2	3	256
6	HAL Mahadevpura CCC	138	85	53	-	818
7	RR Nagar CCC	370	292	78	-	735
8	Hebbal CCC	55	33	12	-	202
9	Bannerghata CCC	60	55	5	-	16
10	Anjanapura CCC	50	45	5	-	142
11	Garden City Hospital	60	50	4	6	-
12	OYO Isolation center	18	18	-	-	-
13	Devanahalli Gen Hospital	92	78	7	7	80
14	Konanuru Health Center	25	25	25	-	87
15	Dodbalapur Gen Hospital		Opening on 7th July			

PROTECT THE PROTECTOR CAMPAIGN

With back to back covid waves and vaccination, there was limited supply of PPE materials therefore we provided the same to multiple COVID treatment centers/ Government hospitals.

Table: Details of Protect the Protector Campaign in Karnataka

Name Of Covid Treatment Centre/ Hospital/ Departments etc.	Type of Support
Charaka Hospital	PPE, Masks, Gloves, Faceshield
Jayanagar GH	PPE, Masks, Gloves, Faceshield
Yelahanka GH	PPE, Masks, Faceshield
Anekal GH	PPE, Masks, Gloves, Faceshield
Victoria Hospital	Masks, Gloves
HAL Mahadevpura CCC	PPE, Masks
RR Nagar CCC	PPE, Masks, Gloves, Faceshield
Hebbal CCC	Masks, Gloves
Garden City	PPE, Masks, Gloves, Faceshield
Bowring Hospital	Masks, Gloves, Faceshield

COMMUNITY ACTIVITIES

Community awareness in maintaining social distancing, wearing mask, maintaining hand hygiene, vaccination, do's and don'ts after vaccination, myths and facts associated with COVID were disseminated in form of posters, banners, creative signages etc. in all the hospitals and vaccination centres.

Below is the outcomes of our community Activities in the state

Reached 1.5 Lakh people

in the community through mass counselling by doctors.

More than 300 public places are covered with creative

signages on importance of mask, social distancing and hand hygiene .

VACCINATION CENTRE

Vaccination has become the need of the day when it comes to fighting this pandemic. Bangalore being a densely populated city, vaccinating proved to be a challenging task due to the scarcity of Covid centres and limited manpower. Prior to official collaboration with the state government, DFY team has been supporting the state with manpower which resulted in creation of multiple Covid centres in Bangalore.

Currently in collaboration with Karnataka Government **Doctors For You have started 21 Vaccination Centres** (16 centres in the Urban area and 5 centres in Rural areas of Bangalore). **Till date our team have vaccinated more than 1 lakh beneficiaries.**

Table: Details of Vaccination Centre Supported by DFY in Karnataka

Sr. No.	Name of the Centres	Citizens		Front Line Workers		Health Workers	
		(1st Dose)	(2nd Dose)	(1st Dose)	(2nd Dose)	(1st Dose)	(2nd Dose)
1	Anjanapura Vaccination Center	526	326	315	251	179	147

21	Anekal Taluk Hospital	5083	2983	1963	976	2983	302

TRAINING AND CAPACITY BUILDING

Training of Doctors every week regarding the new updated treatment protocol via zoom call and weekly training for nursing staff is also done. Support staff training regarding the patient care and hygiene of the center was conducted. House Keeping staffs are trained 7 days once regarding cleaning and sanitation procedures.

INFRASTRUCTURE AND EQUIPMENT SUPPORT DETAILS

Below is a list of Equipment and other support provided by DFY to the health care facilities and health care workers in the state of Karnataka

Name of COVID Treatment Centre/Hospital/Departments/Others etc	Type of Support
YELAHANKA GH	Oxygen Concentrator, ICU Equipment, Infrastructure Support
KR PURAM GH	Oxygen Concentrator, Medical Equipment, Infrastructure Support
JAYANAGAR GH	ABG Machine , AED , Pulseox , IR Thermometer, Nebuliser, BiPap machines, BP Apparatus, Glucometer, Air Bed , Suction Machine , Flow meter, sanitizer, Infrastructure Support
GARDEN CITY HOSPITAL	ECG Machine, Oxygen Concentrators , Pulseox , Ir Thermometer, Nebuliser, BiPap machines, BP Apparatus, Glucometer, sanitizer, Stretcher, Wheel Chair, AED Machine
HAL MAHADEVPURA CCC	Autoclave, AED Machine, Para Monitor, Pulseox, Nebuliser, Steamer , BiPap machines, B.P Apparatus, sanitizer
HEBBAL CCC	Nebuliser, Steamer, BiPap machines , AED Machine, Autoclave, BP Apparatus, sanitizer
RR NAGAR	Autoclave , AED Machine, Para Monitor, Pulseox, Nebuliser, Steamer, BiPap machines, B.P Apparatus, sanitizer
Kidwai Hospital	Mask, sanitizer
Gosha Hospital	PPE, Mask, sanitizer, Gloves
KPCL	Ventilator, BiPaP machine, Infrastructure support, paediatric ward with child friendly space, complete ICU equipment

“It is commendable that corporates have joined hand with the government in the fight against COVID second wave. It is indeed a great pleasure that Being India has partnered with SELCO Foundation and DFY to build a 100 bed oxygenated super-facility at the KSPCL campus in Yelahanka” , Hon'ble Chief Minister of Karnataka Shri B S. Yediyurappa.

BIHAR

State-wise activity reports

In Bihar the first COVID-19 case was reported on **March 22, 2020 in Munger.**

Since then, Bihar has seen a surge of Covid-19 in the state. A large number of patients failed to reach the health system as the burden of diseases over whelmed the existence health structure.

Covid Treatment Centre

DFY has been working in the state of Bihar for a long time. It has its own **charitable hospital in Masahri village, Patna district.** In the month of April, the Second wave was on peak it was difficult for patients to get oxygenated beds in hospitals. It was then decided by the authorities to start a Dedicated COVID Centre with oxygen support. **Doctors For You, Bihar Government and Care USA together redesigned the sports complex and established a make shift hospital of 110 oxygenated bed including 10 bed HDU.**

Initially DFY was supposed to operate at **Dedicated Covid Health Center** level and admit mild to moderate cases but observing the crisis situation in Patna, DFY decided to admit any sick and patient with low oxygen level who is unable to get a hospital bed in any hospital of Bihar. As a result of it DFY started admitting many severe covid patients and most of them recovered in the centre itself. When migrants were surged to their home town, the covid cases were on surge.

Doctors For You (DFY) has dedicated their own hospital to Covid Care Centre under the flagship of Bihar government. DFY has opened a 50 bed treatment centre with ICU support for patients with the Covid Positive at Masarhi, Fatuha block, Patna district.

The details of Covid Treatment centres run by DFY is below

Table: Details of COVID Treatment Centre in Bihar supported and run by DFY

Sr. No	Name of the Centres	Total No. of Beds Supported	No. of General Beds supported	No. of HDU Beds supported	No. of ICU Beds supported	Total No. of Beneficiaries
1	Patliputra Sports Complex	110	100	10	-	102
2	Vistex DFY-Charitable Hospital	50	31	15	04	142

INFRASTRUCTURE & EQUIPMENT SUPPORT

Keeping in mind the necessary instructions, doctors and nurses are required to take care of themselves along with the patient. The way the Covid-19 epidemic has spread throughout the country, it is important that the health workers take care of themselves, they can take care of the patient. For this Protect the Protector Campaign was started by DFY.

The details of this campaign is below

Table: Details of Infrastructure & Equipment Support in Bihar

Name of COVID Treatment Centre/Hospital/Departments etc.	Type of Support
MISSION HOSPITAL MADHEPURA	PPE materials, Medicine & Consumable, D-type oxygen cylinders, flowmeter
AIIMS, PATNA	Flowmeter, Oxygen Concentrator, Ventilator
HOMI BHABHA CANCER RESEARCH & HOSPITAL	Oxygen Concentrator, N-95 Mask, D-type oxygen cylinders
BIHAR GOVT. HOSPITAL	PSA Based Plant, PPE Kit, Oxygen Concentrator (10l), 3 Ply Mask, N95 Mask, D-type Oxygen Cylinder (BMSCIL), Cryogenic Cylinder (198L), Oxygen Flowmeter With Nasal Prongs, Faceshield
VISTEX CHARITABLE HOSPITAL	PPE Kit, Oxygen Concentrator (10l), 3 Ply Mask, N95 Mask, D-type Oxygen Cylinder, Oxygen Flowmeter With Nasal Prongs, Faceshield, PSA Based Plant (150 LPM), Ambulance ALS
PATLIPUTRA SPORTS COMPLEX	PPE Kit, Oxygen Concentrator (10l), 3 Ply Mask, N95 Mask, D-type Oxygen Cylinder, Oxygen Flowmeter With Nasal Prongs, Faceshield, PSA Based Plant (150 LPM), Medicine & consumable
DUNCAN RAXAUL	PSA Based Plant (280 LPM), Oxygen Concentrator
CHRISTIAN MEDICAL CENTRE & HOSPITAL	PSA Based Plant (419 LPM), Oxygen Concentrator

COMMUNITY ACTIVITY

Community screening for Covid-19 using Rapid antigen test kit were carried out in Bihar. Hygiene kit distribution and awareness activities also carried out by DFY team on ground. In the rural part of Bihar there is no isolation facility for infected cases, early detection of infection and awareness and providing isolation facilities may break the chain of Covid-19.

Below are the outcome of community activities carried out by DFY in Bihar-

VACCINATION CENTRE

With rising cases in India, vaccination is the most effective tool in our battle against COVID-19. Due to various myths regarding vaccination and lack of awareness, vaccination coverage rate is very low in country, same trend continues to be in Bihar also. Contributing to the vaccination drive in India is our biggest priority right now.

We are running our vaccination centre in Vistex-DFY Charitable Hospital and selected Government health care facilities. Through our Vistex-DFY Charitable Hospital we are also providing transportation to the people who are coming from far distance.

Vistex-DFY Charitable Hospital started on 26th May 2021. It covers more than 70 villages of Fatuha, Daniyawa and Sampatchack block.

Table: Details of Vaccination Centre Supported by DFY in Bihar.

Sr. No.	Name of the Centres	Citizens		Front Line Workers		Health Workers	
		(1st Dose)	(2nd Dose)	(1st Dose)	(2nd Dose)	(1st Dose)	(2nd Dose)
1	PHC MANER	1532	313	6	14	0	6
2	PHC Danapur	2101	2353	54	49	11	88
3	Gardiner hospital	7735	6497	797	789	77	66
4	Vistex DFY Charitable Hospital	842	396	4	3	25	7

TRAINING AND CAPACITY BUILDING

Training of healthcare workers is one of the key components of our COVID response program. We **trained 50 doctors working in DCHCs** of different districts of Bihar. Our training included lectures and in ward practical training. We also trained nurses working in COVID Care and allowed them to do observership in our facility. Since Covid-19 is new for scientists, researchers and public health professionals. The information and knowledge about covid19 is increasing gradually and directives/ guidelines keep changing, it is necessary to keep our health care workers updated about it.

HOSPITAL COURSE

Success Story

Patient Name – Sushila Devi

Age – 62 Years / Female

Address- Bazar samiti Samastipur

Date of Admission – 14-05-2021

Date of Discharge – 26-05-2021

Diagnosis - Severe Covid-19 Pneumonia with Dilated Cardiomyopathy+CAD+ DM-II

Outcome – Discharge with Advice

Mrs. Sushila Devi – 62Yr old Female Is a known case of dilated cardiomyopathy with ejection fraction (18-20) % LVEF, In Echocardiography done on 10-05-2021 and ECG changes Diagnosis Left axis deviation and other findings consistent dilated cardiomyopathy. Also, she had diabetes mellitus. Patient was admitted to patliputra DCHC on 14-05-2021 with presenting chief complaint of shortness of breath, Chest pain and malaise with severe weakness, on examination her vitals were – pulse -130/min, BP-90/60 mmHg chest – B/L Crepts with decreased currently in B/L Lower lung fields her saturation was 80% on Room air and respiratory fatigue ; General condition very poor.

Patient was admitted and relevant investigation were done her differential count was 90%, D-dimer – 1.21, RBS- 259, Urea – 112.5mg/dl, S.creatinine – 1.46, Uric acid – 7.8 mg/dl, HbA1C- 8.7% , CRP-20.7mg/l , s.ferritin – 1324ng/ml and viral markers were non-Reactive. She was started on treatment with injection cefoperazone, Tab. Zinc, Tab. Vit-c, Inj. Enoxaparin, Inj. Methylprednisolone, inj. Pantoprazole and insulin Rapid acting on sliding scale. Foley's Catheter was inserted in situ to measure the urine output which was slightly decreased so inj. Lasix (20) mg OD was added. HCRT repeats Dated 20-06-2021 suggestive of covid-19 pneumonia with Corads score (18/25). Condition of the patient gradually improved on medication and chest physio therapy with declining inflammatory mediatory and maintaining SPO2 above 90% on Room air.

Finally, the patient was able to ambulate and patient performed 6 min walking test without O2 support, which was uneventful and patient was discharged finally on 26-05-2021.

HOSPITAL COURSE

Mr. Raj Kishor Poddar 52Yr Male is a known case of Advance HIV+(CD4 count= <200) with cryptococcal diarrhoea and pulmonary tuberculosis having. Patient was admitted to patliputra DCHC on 17-05-2021 with presenting complain of fever, chest pain, Breathlessness sore throat cough there was Abdominal distension and facial and pedal edema it is vitals were Pulse-85bpm, BP-198/94mmHg, RR-26/min, Temp. 96.7oF, Spo2-94%@RA, RS-B/L crepts with decreased air entry in B/L lower lung field general condition was very poor.

Patient was admitted. He had History of vertical transmission of HIV+ since birth - (CD4 count= <200), D-dimer – 2.23ug/mL, CRP-13.8mg/L. He was started on treatment with tab.cotrimoxazole, tab.doxycycline, tab. Vit-c, tab. Omez, tab. Paracetamol. (Given with distinguish with doctors on duty) with his ARV (T. Abacavir, Lamivudin, Efavirenz). Foley's Catheter was inserted in situ to measure the urine output as patient was immobile and saturation dropped on walking. Condition of the patient gradually improved on medication and chest physio therapy with declining inflammatory mediatory and maintaining SPO2 above 90% on Room air. Finally, the patient was able to ambulate and patient performed 6 min walking test without O2 support, which was uneventful and patient was discharged finally on 11-06-2021.

Success Story

Patient Name – Raj Kishor Poddar

Age – 52 Years / Male

Address- Khagria

Date of Admission – 17-05-2021

Date of Discharge – 20-05-2021

Diagnosis – Advanced HIV+ (CD4 count= <200) severe Malnutrition +Cryptococcal Diarrhoea + Pulmonary tuberculosis

Outcome – Discharge with Advice

Success Story

Patient Name – Shivam Singh

Age – 16 Years / Male

Address- Lalachhapra, Saran

Date of Admission – 03-06-2021

Date of Discharge – 11-06-2021

Diagnosis – Advanced HIV+(AIDS) +

Severe malnutrition + Covid-19

Pneumonia + Pulmonary tuberculosis +

cryptococcal diarrhoea (chronic)

Outcome – Discharge with Advice

HOSPITAL COURSE

Mr. Shivam Singh 16Yr old male is a known case of advanced HIV with chronic diarrhea and cervical lymphadenopathy due to pulmonary tuberculosis. Patient was admitted to Patliputra DCHC on 03-06-2021 with presenting chief complain of fever with cough with vomiting. There was Abdominal distension and facial and pedal edema His vitals were Pulse – 112bpm, BP-107/76mmHg, chest B/L crepts with decreased air entry in B/L lower lung field. His saturation was 85% on Room air, general condition very Poor.

Patient was admitted. He has vertical transmission of HIV since birth. Relevant investigation was done (CD4 count= <200), D-dimer – 2.23ug/mL, CRP- 13.7mg/L, He was started on treatment with tab.cotrimoxazole, tab.doxycycline, tab. Vit-c, tab. Omez, tab. Paracetamol. (Given with distinguish with doctors on duty) with his ARV (T.Abacavir, Lamivudin, Efavirenz).

Foley's Catheter was inserted in situ to measure the urine output as patient was immobile and saturation dropped on walking. Condition of the patient gradually improved on medication and chest physio therapy along with declining inflammatory mediatory and maintaining SPO2 above 90% on Room air.

Finally, the patient was able to ambulate and patient performed 6 min walking test without O2 support, which was uneventful and patient was discharged finally on 11-06-2021.

HOSPITAL COURSE

Md. Akbar 31Yr old Male is a known case of Advanced HIV+, with chronic diarrhoea and cervical lymphadenopathy due to pulmonary tuberculosis. Patient was admitted to patliputra DCHC on 10-05-2021 with presenting chief complaint of Fevers, chest pain, breathlessness, sore throat, cough there was abdominal distention and facial and pedal edema. His vitals was Temp. 97.0 F, Pulse -122bpm, RR-30/min, SPO2-98% RA, BP-109/77mmHg, chest B/L crepts with decrease air entry in B/L lower lungs field. His saturation 85% on Room air, general condition was very poor. Patient was admitted, he has history of HIV+ since birth through vertical transmission, Relevant investigation were done CD4 count was 120/dl, D-Dimer:2.23ng/ml, CRP:13.4mg/dl

He was started on treatment with tab.cotrimoxazole, tab.doxycycline, tab. Vit-c, tab. Omez, tab. Paracetamol. (Given with distinguish with doctors on duty) with his ARV (T.Abacavir, Lamivudin, Efavirenz) Foley's Catheter was inserted in situ to measure the urine output as patient was immobile and saturation dropped on walking. Condition of the patient gradually improved on medication and chest physio therapy with declining inflammatory mediatory and maintaining SPO2 above 90% on Room air.

Finally, the patient was able to ambulate and patient performed 6 min walking test without O2 support, which was uneventful and patient was discharged finally on 21-05-2021.

Diagnosis – Advanced HIV+ Cryptococcal

Diarrhoea+ Pulmonary tuberculosis

Outcome – Discharge with Advice

HARYANA

The first case of the COVID-19 pandemic in the Indian state of Haryana was reported on 4 March 2020. DFY team in Haryana has been engaged in multiple interventions against Covid-19.

Covid Treatment Centre

Due to increasing number of cases in the second wave of COVID and already burdened existing health infrastructure of Haryana, an urgent need was felt to create more safe spaces where patients could be treated and managed for Covid illness. Sharp rise in cases in Haryana during the second wave prompted the setting up of the facility at Gurugram to provide free of cost service to the needy. Thus the Gurugram district administration along with Doctors For You team and with collaborations of corporate donors created make shift COVID CARE CENTERS. These centres acted as buffering zones and helped the state run government hospitals and private hospitals in managing the load of Mild to moderate cases. A few of our centres were even equipped with ICU and HDUs to cater to seriously ill patients.

Table: Details of Covid Care Centre in Haryana

Sr. No	Name of the Centres	Total No. of Beds Supported	No. of General Beds supported	No. of HDU Beds supported	No. of ICU Beds supported	Total No. of Beneficiaries
1	M3M Urbana Sec-67	200	200	-	-	22
2	Govt. Girls College Sector-14	100	100	-	-	8
3	Tau Devi Lal Sports Complex, Sector 38	100	60	18	22	15

PROTECT THE PROTECTOR CAMPAIGN

All staff, medical, paramedical as well as house-keeping and nursing orderlies, were provided with PPE kits, as well as training on donning and doffing as per protocols. Staffs were introduced to smart PPE use. There was a clear and distinct demarcation between Red Zone and Green Zone.

Table: Details of Protect the Protector in Haryana by DFY

Name of COVID Treatment Centre/Hospital/Departments etc.	Type of Support (PPE materials and cumulative number of each item)
M3M Urbana Sec-67	Full PPE kits, Face shields, Shoe covers, Goggles, Gloves, Micropore tape
Govt. Girls College Sector-14	Full PPE kits, Face shields, Shoe covers, Goggles, Gloves, Micropore tape
Tau Devi Lal Sports Complex, Sector 38	Full PPE kits, Face shields, Shoe covers, Goggles, Gloves, Micropore tape

VACCINATION CENTRE

3	UPHC Surkhilai	-	-	-	-	-	-
4	UPHC Chanderlok	-	-	-	-	-	-
5	PHC Wazirabad	-	-	-	-	-	-

UPHC Surkhilai, UPHC Chanderlok, PHC Wazirabad Have been recently opened in the last week of June, 2021.

TRAINING AND CAPACITY BUILDING

In the wake of Covid-19 in Haryana, DFY team has done the capacity building of medical and paramedical professionals to bring their confidence in managing and handling Covid-19 pandemic.

Details of Training and Capacity Building

Medical team leads trained the doctors on screening protocol

Training session on oxygen cylinder use and handling

Training on use of Ventilator machines, suction machines, ABG analyser and BiPAP machine

Training of Doctors for Screening of complications of Covid-19 including mucor mycosis.

Training on use of steroids in Covid-19 management.

EQUIPMENT SUPPORT

Following are the list of Equipment support given by DFY in Haryana.
It is summarised in the table below:

Name of COVID Treatment Centre/Hospital/Departments/Others etc.	Type of Support (Name and number of equipment's supported)
M3M, Gurugram - 67	Oxygen cylinders Ambulance Multipara Monitors Oxygen Concentrator BiPap machines Portable ventilator
Govt. Girls College Sector-14	Oxygen cylinders Ambulance Multipara Monitors Oxygen Concentrator
Tau Devi Lal Sports Complex, Sector 38	Oxygen cylinder Ambulance Multipara Monitors Oxygen concentrator Ventilators BiPap X-Ray Machine ABG analyser Central oxygen line Suction Machine ECG Machine Defibrillator Crash cart Infusion Pumps Air Warmer

Success Story

“

Holistic Treatment

Morning yoga sessions were held in the wards. Video calling facility was offered on a daily basis also recreation activities & other certain patient welfare activities were done.

”

“

Family access to doctors

Each family was provided with the phone number of the green zone for easy access to medical staff for the questions regarding their patient. Doctors also made post-rounds daily calls to patients' families & to update them the vitals and ongoing treatment.

”

“

Happy Patients

The centre received the highest patient feedback scores of any government establishment center in the district.

”

The details of Covid Treatment centre is given below in the table.

Table: Details of COVID Treatment Centre in Andhra Pradesh

Sr. No	Name of the Centres	Total No. of Beds Supported	No. of General Beds supported	No. of HDU/Oxygen Beds supported	No. of ICU Beds supported	Total No. of Beneficiaries
1	District Hospital Machilipatnam	50	-	-	50	21,309
2	Area Hospital Gudiwada	50	-	-	50	1,022

COMMUNITY ACTIVITIES

To trace and test every possible case of COVID-19 is the key to contain the spread of this highly contagious virus. Early Identification of COVID19 hotspots and tracing and testing of every suspect and their contacts in rural areas of Vijayawada is key to break the chain of transmission. At the same time, it becomes essential to generate awareness among the community, guide them with precautionary measures about the dos and don'ts, and to provide access to having material resources like hand wash, soaps etc. to the community.

The community awareness project was started in rural and backward communities. The reports find that, testing capacity was low and couldn't help in identifying the positive cases. In this regard, community needs regular interval of health education and in-time prophylaxis.

This led to, the **Team HCL-DFY**, supporting the district administration with a Medical Mobilizing Unit (MMU), which helped in identifying and addressing the core issues, strengthening the bond of health workers with community, alleviating their fears & anxieties and in turn helped them by providing regular medical visits, immunity boosters to the vulnerable people and screening them for COVID.

The outcome of our community activities in the state are mentioned below in the points-

No. of people screened

34,161

No. of people referred through MMU

348

No. of people treated

34,161

No. of people received hygiene kits

6,645

No. of Covid patients provided with Morning kits

500

VACCINATION CENTRE

Although the state vaccination drive had started in India, there still was a huge need in terms of medical human resources, cold chain management, Vaccine distribution and immunization activities. That's where DFY stepped up and provided man power, vaccines and other resources required for the process of vaccination.

Currently HCL Foundation-DFY is supporting vaccination centres in Vijayawada.

Table: Details of Vaccination Centre in Andhra Pradesh supported by DFY

Sr. No.	Name of the Centres	Citizens		Front Line Workers		Health Workers	
		(1st Dose)	(2nd Dose)	(1st Dose)	(2nd Dose)	(1st Dose)	(2nd Dose)
1	Gannavaram	8372	4818	665	410	384	391
2	Vuyyuru	8876	6086	668	989	358	595
3	KothaPet	9141	4919	583	451	354	206

TRAINING & CAPACITY BUILDING

At present health workers are most vulnerable. Firstly COVID 19 virus is highly contagious and secondly medical staff members have limited training to handle such highly infectious cases in their existing set up. They need urgent support and training to handle COVID 19 affected patients in their health facilities. Our plan is to support health workers by imparting training & capacity building exercise on Infection prevention & Control while handling COVID 19 positive cases.

The staff needed to be imparted knowledge about new techniques and methods that are introduced into the SOPs and how the COVID appropriate behaviour has to be followed by the community.

In this regard several kinds of awareness sessions have been conducted among the different groups of people. The details are below in the table.

Table: Details of Training and Capacity Building in Andhra Pradesh

Sr.No	Name of Training	Profile of Beneficiary	Total No. of Beneficiaries
1	Health education camp on COVID-19 and COVID appropriate behavior	Community	34,161
2	Sanitary precautions inside the hospitals	Hygiene & Sanitation workers	2051
3	COVID-19 centre handling sessions	Doctors and Nurses	241
4	Explaining SOPs and training for Covid Appropriate Behaviour	Doctors and Nurses	279

EQUIPMENT SUPPORT AND OTHERS

The existing medical infrastructure was not able to fulfil the requirement of community in terms of ICU beds and Covid-19 treatment facilities. In this regard **DFY- HCL support was intended to fulfil the needs of community.** It supported the Krishna District Administration with the medical infrastructure by transforming two hospitals as COVID hospitals. **The material provided by DFY** are ICU Beds, Ventilators, Syringe pumps, ECG Machines, Medicine racks etc.

The details of supported provided by DFY under this initiative is given below in the table.

Table: Equipment Support by DFY in Andhra Pradesh

SR.NO	Name of COVID Treatment Centre/Hospital/Departments/Others etc.	Type of Support
1	District Hospital- Machilipatnam	ICU Beds with Mattress, Crash-cart, Medicine Racks, Oxygen cylinders, Oxygen cylinder stands, Pulse Oxymeter, Digital BP apparatus, Ventilators, Syringe pumps, ECG Machine, Desktop, Printer, Swab Collection Booth
2	Area Hospital - Gudiwada	ICU Beds with Mattress, Crash-cart, Linctus Racks, Oxygen cylinders, Oxygen cylinder stands, Pulse Oxymeter, Digital BP apparatus, Ventilators, Syringe pumps, ECG Machine, Desktop, Printer, Swab Collection Booth

ASSAM

Assam witnessed spike in number of COVID-19 cases as migrants and many people who are stranded in other parts of the country returned after first wave.

On March 31, 2020, the first incidence of the COVID-19 pandemic was recorded in the Indian state of Assam. As of June 25, 2021, the Government of Assam had **confirmed 89,468 positive COVID-19 cases** in the state, **with 67,641 recoveries, three migrations, and 234 fatalities.**

In this fight against Covid-19 in Assam, **DFY has supported Assam through Protect the Protector Campaign.**

Protect the Protector in Assam

In the first wave of the COVID-19 pandemic, as the number of cases in India continued to rise, doctors, nurses, lab technicians, and other healthcare staff working at hospitals became prone of more risk of COVID-19 infection. Infection of health workers has been a problem during the outbreak because of the lack and shortage of PPE's. To overcome the situation Doctors For You started a campaign '**Protect the Protectors**' to supply essential PPE and medical equipment to critical healthcare facilities. Under this campaign.

While we fight the pandemic with all our strength, it is important to see that access to TB care services is maintained without interruption. For ensuring the safety of laboratory technicians performing microscopy/rapid molecular testing from COVID-19, Doctors For You supported with **500 N95 mask to State TB Cell Assam.**

COMMUNITY ACTIVITIES IN ASSAM

Doctors For You have been working with flood-affected rural communities in the Sonitpur district of Assam since 2017. The first wave of COVID-19 has increased the risk of flood-affected communities that are already vulnerable, and the extensive lockdown has further compounded the situation in terms of income, livelihood, and access to some essential services. At that time the flood-affected communities were compromised of basic personal protective and hygiene materials needed for the prevention of COVID-19.

The use of masks, physical distancing, and maintaining hygiene have become one single most proactive measures to help the spread of COVID-19. In the first wave of COVID-19, the flood-affected rural communities where Doctors For You is working were deprived of basic protective and hygiene materials. To help stop the spread and impact of coronavirus Doctors For You distributed the basic protective and hygiene materials to support children and families.

Through our community outreach activities we have been able to reach more than 10,000 population in Sonitpur district of Assam. We have distributed Prevention Kit and conducted community awareness activities on COVID appropriate behaviour.

Chhattisgarh

State-wise activity reports

In Chhattisgarh, because of rising cases in the second wave, DFY along with district administration and with help of donors established dedicated COVID care hospitals in tribal and rural areas to get access to better health care needed for treatment of COVID.

Doctors For You has been working closely with Chhattisgarh government on COVID treatment center in Ambikapur and Raipur district.

COVID Treatment Centre

In the state of Chhattisgarh, the second COVID wave hit severely especially the areas home to rural and tribal population. To help with dealing the emerging cases of COVID two dedicated COVID Care Centers were created with the help of local administration and DFY team. Raipur, being the capital of Chhattisgarh is the most populous area thus was being severely affected by the second wave of a pandemic resulting in more active cases and deaths. Dedicated Covid-19 hospital Mana, because of its geographical area, socio and economic conditions of that particular area, and its distance from Raipur city serve utmost services to the people. It is one of the dedicated centres of Covid-19 where severe cases were admitted and diagnosed. Serious cases of Raipur were referred here because of the availability of ICUs and ventilators.

Ambikapur is a remote and tribal district of Chhattisgarh. It was stressed with the burden of severe and critical patients from all 5 districts of Surguja Division which was witnessing over 2500 new COVID patient on daily, over 19000 active patients and over 500 deaths. As COVID 19 progresses into rural areas, the load on the ICU in Government medical college, Ambikapur was increasing rapidly. There were limited trained medical professional for the new ICU. DFY supported to strengthen the existing infrastructure by adding more manpower, resources and amplifying the services and treatments,

Table: Details of Covid Treatment Centre in Chhattisgarh

SR.No	Name of centre	Total No. of beds supported	No. of general beds supported	No. of HDU beds supported	No. of ICU beds supported	Total No. of beneficiaries reached
1	ICU- District Hospital, Ambikapur	30	-	10	20	50
2	Dedicated Covid-19 hospital Mana	144	-	120	24	505

PROTECT THE PROTECTOR CAMPAIGN

To keep all staff safe and well during this pandemic time, DFY has donated PPE kits to all staffs including paramedical, medical, as well as housekeeping and orderlies.

PPE material distribution details

- | | |
|------------------|-------------------|
| 1. Full PPE Kits | 5. Loose Gloves |
| 2. Face Shields | 6. Micropore tape |
| 3. Shoe Covers | 7. N-95 Masks |
| 4. Goggles | 8. 3-Ply Masks |

SUCCESS STORIES

75 Year Old Female with Diabetes, Hypertension and Obesity was admitted in the ICU with Severe covid and saturation of 83% on Admission. She was hypoxic and her sugar and blood pressure was fluctuating. She was treated extensively and given proper care. Finally after 15 days of care and treatment, she got discharged with all good health.

DFY doctors started intervention with emergency medicine. Patients veins were difficult to palpate and unable to get vein for cannula then DFY nurses did a great job in putting cannula and also central line aiding to save patients life. Patient monitored closely and all vitals became normal in short time and patient got stable.

70 years old Male with severe covid illness and hypoxia with 68% saturation. He was also suffering from deranged sugar levels. He got extensive treatment for covid with oxygen therapy. He later got more severe pneumonia but with proper treatment and chest physiotherapy, got better. He got discharged on 26th may 2021 happily because on 28 may he had wedding of his son and daughter back home at village.

Testimonials From Partners

Dr. PARVATHY MOHANDAS (Wipro Foundation)

Since last year, COVID-19 has been continuously affecting lives across the globe and the situation was not much different in India as well. It was during the first wave of COVID-19 pandemic, Wipro foundation decided to partner with DFY to support the emergency healthcare responses. Our partnership with DFY has been instrumental in providing critical healthcare-by setting up isolation and treatment centers, providing ambulance support for transportation of COVID patients, and reaching out to the marginalized communities through effective COVID screening programmes, especially in hard-hit locations like Mumbai and Delhi both during the first and second wave of COVID. DFY was proactive and committed in this emergency and was well equipped in delivering timely healthcare services, which was the need of the hour.

We appreciate the way DFY as an organization has adapted towards a system that not only involves immediate handling of disaster response but their expertise and knowledge in the domain that make them capable of foreseeing, planning, and preparing for the worst-case scenarios. If the opportunity presents itself in the future, we would be happy to work with DFY.

Dr. Mangesh (UNICEF)

I am associated with DOCTORS FOR YOU since July 2020, where UNICEF collaborated with DFY for Strengthening Risk Communication and Community Engagement (RCCE), COVID19 surveillance, contact tracing, IPC and ensuring continuity of essential RMNCA health and nutrition services during COVID19 emergency in two wards of Mumbai. The partnership with DFY proved extremely strategic for reaching out to the most marginalized and vulnerable section of the urban slums the expertise and experience of DFY team in emergency work is remarkable. Based on this experience UNICEF continued the partnership with DFY towards a long term goal of Health Systems strengthening through comprehensive Urban Primary Health Care approach in MCGM.

DFY has extremely good connect with the communities and therefore engaging through DFY gives immense advantage working with vulnerable and marginalized communities. I would definitely prefer working with DFY in future.

Arun Fernandes (CEO – Hotstuff Media Group)

“Storytelling can do more powerful things than persuasive content. What we did was nothing in comparison to what the DFY team did on ground. Each life-saving incident becomes a powerful story that impacts people’s lives. I am particularly glad that Hotstuff could be of aid to DFY in reaching these stories to people so that they knew about DFY and could reach out to DFY when they required them and recommend them to all communities”

Testimonials From DFY Team

Dr Gaurav Bhardwaj

I have been associated with DFY since 18th of April 2021, I am currently posted as a doctor in Rouse avenue covid care center which is an extension of Lok Nayak hospital. We have treated 200 patients and being associated with DFY has helped me for my oath that I took as a doctor and I have been able to treat several of patients. During my services I have never felt shortage of anything, be it consumables, non-consumables, lack of manpower. If there was anything that was not available, we put a request and it was fulfilled at the earliest. The entire administration is very supportive. Overall it has been a very good experience at DFY and I really like what they have done this pandemic which required lot of efforts by the medical community.

Dr. Ashita

I am working with DFY at Yelhanka general hospital. DFY in Karnataka has given us various opportunities to work in ground level to treat the COVID19 patient. They have adequate facilities so that we could discharge our duties efficiently and treat our patients in very effective way. They give us good facilities so that we don't have any other problem regarding our safety and patient exposure. They have organized setup which is very doctor friendly. And finally I would like to thank DFY for giving us a chance to be a part of this team and serve the patients when it was required.

Dr. Apoorv

I have started working with DFY from 24th April 2021. When I met Dr. Rajat in his office, he told me to report on next day at Yamuna Sports Complex Covid Care center where hundreds of covid patients were admitted, the arrangements made for patients by DFY was commendable. Dr Anurag, Dr. Rajat always ensured that the working environment was comfortable and all the staffs were at ease, they were 24*7 with us to ensure nobody faces any problem. I would like to thank Dr. Rajat and DFY from the bottom of my heart.

Dr. Divya

I am working with DFY, in Yelhanka general hospital, Bangalore. DFY is a NGO which is helping the country in the management of health crisis that is covid19 by hiring various health care staffs and even providing the drugs and all the equipment required in the treatment of covid19 patients. As a doctor working in this organization and getting an opportunity to serve the nation in a safe atmosphere boosts me to work further so I thank DFY for providing me this opportunity to help the country during this crisis.

Testimonials From DFY Team

Dr. Vaishali Venu

Doctors For You (DFY) has been my second home ever since I started my journey here. During this time period, experienced a wave of emotions through various complexities of the job and its prolific outcomes which has only led to exponential growth. Though all of this has been overwhelming, the last one and half year of COVID19 pandemic has been the most challenging yet gratifying phase. The real essence of team DFY emerged during these times wherein the team has worked relentlessly, providing healthcare services through various projects. This has led to immense satisfaction as we were able to reach the vulnerable, provide essentials to the needy, support the government and stay focussed during this unprecedented phase.

During this course of pandemic, the stakeholders have been sensitive to have given required support as per the demand from different avenues. Their contribution has impacted lives positively during these hard times, and helped us build a healthy relationship as implementers. Even though COVID19, has been hard on our team, it has only helped us in elevating the human potential of our team members. Trust building with stakeholders, uniting diverse perspectives of team members and adapting sustainable methods to lead through difficult times have created opportunities for DFY as an organization. I would like to appreciate everyone who has worked persistently for this cause and aim to achieve the DFY's vision of Health for All.

Dr. Prakerti Kashyap

I treated many COVID-19 patients, some people were all alone in the centre, new families were created and some had all positive. We celebrated birthdays and festivals together. Amongst this I had a 26yr old patient who was initially mild, her in-laws had thrown her out since she became COVID positive. She found other patients in the facility as her new family. Later she developed severe disease, she even got intubated, she was in the ICU for 15days, no one from her family inquired about her but all other patients prayed for her. She recovered and all of us celebrated and after 28 days got discharged as a normal.

Everyone in DFY works for the people. Time is secondary and all work together as family, in sickness and in health.

As a north Indian I went to banglore to treat patients and give training to the medical staff. Not knowing the regional language was the biggest challenge. In such situation you learn social skills and team work in a different way. Spoken words are not the only forms of communication and every person in your team has their specific role and every team member is important.

DFY is one organization, where the beneficiary and the staff both are equally happy and that too together.

Dr. Manjunath

I have been working under DFY at Yelhanka general hospital. DFY is a well-functioning organization that has been collaborating with various state governments across India to improve the health care services for the management of COVID19. DFY made sure we have enough resources all the time so that the patient care is not hampered at any cost and it provided good working condition for all the medical staffs it has recruited. Personally I have gained a lot of on ground clinical experience in the management of COVID19 patients. I want to thank DFY for providing the opportunity to serve the nation when it was needed the most during the second wave of the pandemic.

Kunal Kapoor

Actor & Co-founder Ketto.org

Ketto.org is South East Asia's most visited and trusted crowdfunding platform. Co-founded by Varun Sheth, Zaheer Adenwala and Actor Kunal Kapoor with an aim to bridge the affordability gap. Here at Ketto, we enable people to raise

funds for health and medical emergencies, natural calamities, education, short-term emergency needs, animal welfare, women empowerment, and many more.

Over the course of the pandemic, Ketto hosted around 12,500 campaigns and raised over Rs 300 crores for COVID relief fundraisers. Doctors For You (DFY) collaborated with us during this time and successfully raised funds to assist the country during the COVID crises, especially when the 2nd wave infested the nation and its resources. DFY assisted in the provision of oxygen, medical equipment, and other necessities. They even teamed up with celebrities, public figures, and others to make a

bigger impact.

DFY's vision to provide affordable & quality medical relief, sustainable & robust healthcare services, capacity building & risk reduction activities in crisis or otherwise; aligns with Ketto's mission to connect people to healthcare and happiness. It was very convenient to be able to work with a foundation that reflects and follows similar guidelines to Ketto and its future plans, and it also gave us a boost to keep doing what we're doing.

When our country was hit by the second wave of COVID, health workers from Doctors For You (DFY) put their lives on the line to help struggling hospitals and critical patients across the country. Led by COVID War Time Consigliere - Saket Kumar SonuWa, numerous fundraisers on Ketto contributed to DFY's COVID relief efforts across the country. The following campaigns are just a few examples of how impactful DFY's campaigns on Ketto had on the nation.

In association with KGP2K Group, and IIT Alumni Network, DFY launched a Ketto campaign with a target of Rs 5 crore to help overburdened hospitals save lives. This fund was used to instantly scale-up the healthcare human resource and in-house capacity of DFY to take care of the sudden rise of COVID crisis. Out of many other accomplishments, the Foundation was able to open 33 make-shift hospitals in all over india within a time period of 30 days.

DFY launched a campaign on Ketto in collaboration with Sauce, Epigamia, Water Bank Foundation, and Friends to urgently procure several critical healthcare equipment and paraphernalia, with funds totalling more than Rs 3 crores. DFY also utilised Epigamia's pan-India logistics and global logistics network to assist in the sourcing and procurement of required equipment.

One of the DFY campaigns on Ketto, in collaboration with Venture capitalist - Haresh Chawla, matched up to 500% for the first 10 donations and 200% for the rest, in order to help more people and save many more lives. The foundation raised over Rs 40 lakh through this campaign, which was used to provide COVID relief across the country.

Fashion Designer brand Gauri & Nainika also started another campaign called 'O2 for Delhi' and their fundraise was used to resource Oxygen concentrators, PSA Plants, and other supporting apparatus in the oxygen line at hospital. A part of their donation was also donated to AIIMS Delhi.

Vhadam India and Doctors For You on Ketto collaborated to crowdfund a COVID Emergency Relief Fund to support increased aid and relief efforts in several Tier-1 and Tier-2 cities across India. The funds raised, which is a whopping amount of more than Rs 60 lakh, which was used to build the in-house capacity of DFY for the providing COVID response.

OYO Care also started a Fundraise for DFY to provide accommodation to the Doctors and Nursing staff. Dozens of OYO employees volunteered, and helped DFY team to manage social media, content creation, copyrighting, report making etc.

Instagram creators group (Shereen & Trishala, and House of Misu, and Sanjana Batra) also started another fundraise for DFY. Apart from fundraise this group also helped streamlining the social media handles of DFY.

More than a dozen fundraise was organised including, Actor Rannvijay Singha, Designer employee, Indian students from Europe, Natasha Moor, and any more.

Mr. Saket Kumar SonuWa

I was amazed to witness how the whole country was united to combat Covid Crisis. Many foreigners also came forward not only to donate but also to promote the activities of DFY. Most of the people and organisations fundraising in Ketto were also helping DFY in its logistics, communications, and other management activities. Ketto team was available at all the time for all the support work required to manage the campaigns.

Mr. Manu Chandra

India was gripped in a catastrophic second wave of COVID. Like many others, I suffered personal loss as well. In my experience of trying to provide basic medical aid to my family members, I realized that even with all the access and privilege that my network brings to me, I was pretty helpless. It was a lot of chaos and was extremely traumatic. My experience led me to reflect and think about those that don't have access to basic needs. That's when a few like minded friends got together - my batchmates from IIM Ahmedabad, friends from Epigamia, folks at Sauce, and volunteers from across the globe. We decided that we need to put together a collective fight. Why Doctors For You:Doctors for You is a community led by doctors, which has been on the frontline fighting the COVID pandemic in India for over a year. They are present in the most remote districts and the most densely populated urban centres. They are the folks who are on the frontline day in and day out, away from their families, putting themselves at personal risk, to control this raging pandemic.

 Through VC inaugurated COVID care hospital in Masarhi village in Patna.
 I want to appreciate Dr. Ravi Kant for setting up a COVID care hospital in Masarhi village of Fathua in Patna.
 By installing Solar panels at the hospital he has clubbed the twin objectives of sustainable energy with good healthcare facility.

 अफ़रातफ़री के माहौल में सटीक और विश्वसनीय। ये लोग सीधे मैदान में तैनात योद्धा हैं। न नेताओं की सुनिये न मीडिया की सुनिये। सुनना है तो इन्हें सुनिये। ये हैं Doctors for You... मायूसी के अंधेरे में उम्मीद की रोशनी।
