Newsletter by Doctor For You

## WHY YOU SHOULD TAKE THE VACCINE ?

**A COVID-19 vaccine might prevent you from getting COVID-19. Or, if you get COVID-19, The vaccine might keep you from becoming seriously ill or from developing serious complications.**

**COVID-19 vaccination will be an important tool to help stop the pandemic**

### DO'S

- 1. Get your vaccine when it's your turn.**
- 2. Get vaccinated if you've already had Covid-19.**
- 3. Get the shot even if you still have Covid symptoms months later.**
- 4. Tell vaccine staff about any allergies or past allergic reactions.**
- 5. Get your second shot of vaccine within the recommended time frame.**
- 6. Continue wearing masks and practicing social distancing even after your shots.**

### DON'T

- 1. Let disinformation on vaccines cloud your judgment.**
- 2. Get vaccinated if you currently have Covid-19 or have been exposed.**
- 3. Get another type of vaccine within 14 days of the Covid-19 shot.**
- 4. Drive away before your 15- to 30-minute wait post shot is up.**
